

HighPROTEC | PROTECTION TECHNOLOGY MADE SIMPLE

MCDGV4 | GENERATOR DIFFERENTIAL PROTECTION

NEW FEATURES - Release 3.6

- · VDE-AR-N 4110
- · G99 Issue 1 Amendment 3
- · Wattmetric Ground Fault Protection
- · IEC 60870-5-104
- · SCADApter for Retrofit
- · Usability improvements
- · IT Security
- · Improved Frequency and ROCOF precision*

APPLICATION

The generator differential protection relay MCDGV4 is a high precision protection for medium and high power generators. The step-up transformer can be integrated into the protection zone (unit protection/ block protection). In addition to the phase and earth differential protection, the device provides a variety of generator-specific protection functions. The "all-inclusive" package comprises also phase, earth current, voltage, frequency and power protection. In addition to that the device offers an undervoltage directional reactive power protection with reconnection function and an adjustable Fault Ride Through (FRT) with AR detection. The intuitive operating concept with plausibility checks and extensive commissioning functions such as the built-in fault simulator allows a safe and time-optimized maintenance and commissioning. The parameter setting and evaluation software Smart view SE can be used consistently across the entire family of devices.

- → The phase and ground differential protection package detects electrical faults within the generator or within the generator and the step-up transformer (unit protection)
- Two elements overexcitation protection (overfluxing) e.g. for the protection of the step-up transformer during run-up (V/f)
 - *i5mHz from 45-55 Hz
- Two elements underexcitation in order to detect faulty excitation
- Overload (Stator) / Thermal replica for the detection of long lasting minor overcurrents
- Six elements (voltage dependent) overcurrent protection (ANSI/IEC/51C/51V)
- Multiple reverse power elements for the protection of the prime mover (Pr, P, Q, S, PF...)
- Negative phase sequence protec-
- \rightarrow Two elements phase distance protection
- → Out of step tripping
- \rightarrow Power swing blocking
- 100% Stator ground fault protection (via third harmonic)
- Multi level overvoltage protection with settable reset ratio in order to protect the stator winding and the stepup transformer against inadmissable
- Multi level undervoltage protection with settable reset ratio
- Wattmetric Ground Fault Protection

- Inadvertent energization detection in order to detect the inadvertent supply of the mains voltage to the generator during
- Buchholz supervision via digital input
- \rightarrow Unbalanced voltage protection
- Multi-Password-Level
- Optional temperature supervision via external URTD-box with 12 sensors

INTERCONNECTION PACKAGE

The comprehensive interconnection package is summarized within one menu:

- FRT (LVRT): Settable FRT-Profiles, optional AR coordinated
- QV-Protection: Undervoltage-Reactive Power protection
- Automatic Reconnection
- Considerably frequency protection package: Six elements configurable as f<, f>, df/dt (ROCOF), Vector Surge
- CB-Intertripping
- Synch Check (Generator to mains, mains-to-mains), options e.g. to switch onto dead bus

RECORDERS

- Disturbance recorder: 120 s non volatile
- Fault recorder: 20 faults
- Event recorder: 300 events
- Trend recorder: 4000 non volatile entries

TIME SYNCHRONISATION

→ SNTP, IRIG-B00X, Modbus, DNP 3.0, IEC60870-5-103/-104

COMMISSIONING SUPPORT

- → USB connection
- \rightarrow Customizable Display (Single-Line, ...)
- \rightarrow Customizable Inserts
- Intergrated fault simulator: current and voltage
- Copy and compare parameter sets
- Configuration files are convertible
- Forcing and disarming of output relays
- Graphical display of tripping characteristics
- 8 languages selectable within the relay

COMMUNICATION OPTIONS

- → IEC 61850, IEC 60870-5-103/-104, Profibus DP
- Modbus RTU and/or Modbus TCP
- DNP 3.0 (RTU, TCP, UDP)
- → SCADApter for Retrofit

IT SECURITY

- Menu for the activation of BDEW-Whitepapercompliant security settings
- Security Logger
- Self-monitoring; Syslog
- Encrypted connection with Smart view

CONTROL

- of up to six breakers (or isolators/ grounding switches)
- Breaker wear
- Exchange of single lines

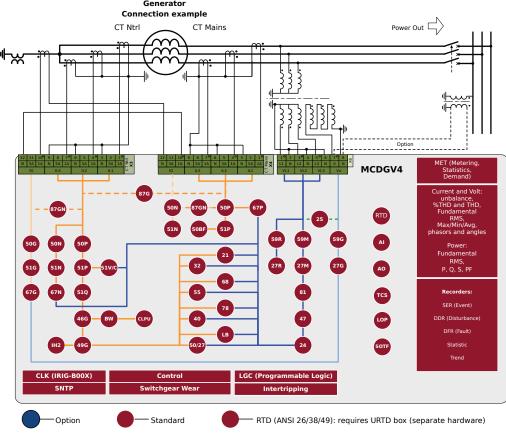

→ Up to 80 logic equations for protection, control and monitoring

PC TOOLS

- Setting and analyzing software Smart view free of charge
- Including Page Editor to design own pages

UNCTIONAL OVERVIEW	Elements	ANSI
Protective Functions		
Generator differential protection, ld>, ld>>	2	87G
Generator- and step-up transformer differential protection (block/unit protection)		87GT
Restricted earth fault IdE>, IdE>>	4	64REF / 87N
time overcurrent and short circuit protection, all elements can be configured for	6	50P, 51P, 67P
directional or non-directional supervision. Multiple reset options		
instantaneous, definite time, reset characteristics according to IEC and ANSI).		
/oltage controlled overcurrent protection by means of adaptive parameters		51C
/oltage dependent overcurrent protection		51V
Negative phase sequence overcurrent protection		51Q
2>, unbalanced load protection with evaluation of the negative phase sequence currents	2	46
Generator unbalanced	1	46G
Overload protection with thermal replica and separate pick-up values for alarm and trip functions	1	49
H2/In, inrush detection with evaluation of the 2nd harmonic	1	Inrush
G, earth overcurrent and short circuit protection, all elements can be configured for		
directional (multi-polarising) or non-directional supervision. Tremendous reset options	4	50N/G, 51N/G, 67N/G
instantaneous, definite time, reset characteristics according to IEC and ANSI).		
E, sensitive earth overcurrent- and short circuit trip, all steps directional or non-directional	4	50Ns, 51Ns, 67Ns
/<, V>, V(t)<, under- and overvoltage protection, time dependent undervoltage protection	6	27, 59
/oltage asymmetry supervision (V012)		
/1, under and overvoltage in positive phase sequence system	6	47
/2, overvoltage in negative phase sequence system		
each of the six frequency protection elements can be used as: f< fs, df, dt, ROCOF, DF/DT, vector surge,	6	81U/O, 81R, 78
/X, residual voltage protection or bus bar voltage for Synch Check	2	27TN / 27A / 59A / 59
or 100% - stator ground fault via evaluation of third harmonic		
Phase distance (backup) protection	2	21P
Power swing blocking		68
oad blinder		70
Out of step tripping (pole-slip protection)	4	78
ExP, External alarm and trip functions	4	22.27
PQS, Power protection	6 2	32, 37 55
PF, Power factor		55 27 (t, AR)
FRT (Fault Ride Through including controlled by AR-feature)	27 (t)	27 (t, An)
Q(V) Protection (undervolt. dep. directional reactive power protection with reclosing disengaging) 0-Minutes-Mean-Square-Sliding Supervision: adjustable according to VDE-AR 4105		
synch Check		25
/olts / Hertz	2	24
oss of field (excitation)	2	40
nadvertent energization		50/27
nauvertent energization		30/2/
Optional Supplemental Devices		
JRTD box: RTD temperature supervision via optional RTD-Box with 12 sensors		26
(R1: Rotor earth fault protection (DIN-Rail-Mounting)		64R
(E2DC: DC current - Loss of excitation, rotating diode failure detection (DIN-Rail-Mounting)		24, 40, 56
be eartern 2033 of excitations, rotating aloae failure detection (bits frail mounting)		21, 10, 50
Supervision Functions		
CBF, circuit breaker failure protection	1	50BF
CS. trip circuit supervision	1	74TC
OP, loss of potential	1	60FL
F, fuse failure protection via digital input	1	60FL
CTS, current transformer supervision	1	60L
CLPU, cold load pickup	1	
SOTF, switch onto fault	1	
"HD supervision		
Breaker wear with programmable wear curves		,
Recorders: Disturbance recorder, fault recorder, event recorder, trend recorder		
Control and Logic		
control and Logic		

FUNCTIONAL OVERVIEW IN ANSI FORM

APPROVALS

certified regarding UL508 (Industrial Controls)

certified regarding CSA-C22.2 No. 14 (Industrial Controls)

Type tested according to IEC60255-1

certified by EAC (Eurasian Conformity)

Component certificate regarding the German grid code standard VDE-AR-N 4110 (2018-11)

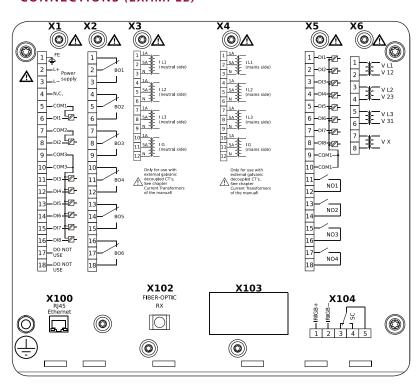

Lloyd's Register Type Approval Certificate

Type Approval Certificate from CQC China

CONNECTIONS (EXAMPLE)

Complies with "Engineering Recommendation G99 Issue 1 Amendment 3 - May 2018". Complies with IEEE 1547-2003. Amended by IEEE 1547a-2014. Complies with ANSI C37.90-2005.
